Before

After

DIRECTION FOR USE:

Apply onto eye area and gently massage until fully absorbed. Allow few minutes for best absorption.

KEY INGREDIENTS

ACTION

| | |
|---|--|
| Epidermal Growth Factors (EGF) | - Working mainly on the outermost layer of the skin, EGF has the remarkable ability to repair skin damage and increase the production of new skin cells. EGF is also essential for vibrant radiant |
| Fibroblast Growth Factors (FGF) | - Speaking directly with the fibroblasts in the lower layer of the skin, FGF instructs these cells to produce collagen and elastin to renew the skin's support structure and improve the appearance of lines and wrinkles |
| Transforming Growth Factor-Beta (TGF-β) | - Proven to stimulate the skin to produce six times more collagen while inhibiting the enzymes that destroy the collagen elastin matrix. TGF-β also repairs skin damage and calms the cellular inflammation that promotes the aging process. |

FREQUENTLY ASKED QUESTIONS

1. Will Rejuve^{MD} make me break out?

No. Rejuve^{MD} is non-comedogenic and will not cause breakouts.

2. How long until I'll see results?

Most users will feel an instant improvement with the first application and visible improvement within 30 days.

3. Will Rejuve^{MD} make my skin sensitive?

No. Rejuve^{MD} is formulated with botanicals and antioxidants that soothe the skin. None of the ingredients cause irritation, including sun sensitivity.

4. Can Rejuve^{MD} be used on oily skin

Yes. Rejuve^{MD} is in a gel/serum base that is very light and will not cause your skin to produce more oil.

5. Can I use Rejuve^{MD} on my neck?

Yes, Rejuve^{MD} will improve the appearance of fine lines, wrinkles and radiance of the neck and décolletage areas.

6. Can I use Rejuve^{MD} with my current skincare regimen?

Yes. Rejuve^{MD} can be used with your own cleanser, toner and SPF moisturizer. Apply Rejuve^{MD} Face & Eye Treatment after you cleanse and tone. Wait until Rejuve^{MD} has completely absorbed into the skin (approx. 10-20 minutes) then apply your SPF Moisturizer.

7. Can men also use Rejuve^{MD} ?

Definitely! Men will see just as much benefit as women.

8. Why is Rejuve^{MD} different from other anti-aging products?

Rejuve^{MD} uses the most potent blend of naturally derived bio-identical Growth Factors. These Growth Factors in Rejuve^{MD} are at the highest concentrations ever used in an anti-aging product. Rejuve^{MD} not only smooths lines and wrinkles but actually improves skin's production of elastin and collagen. In turn, the skin will act and look younger with continued use.

9. What are growth factors?

Growth Factors are signal cells that tell or signal your skin to produce more collagen and elastin to actively and naturally renew itself.

10. What kind of growth factors are in Rejuve^{MD} ?

There are 3 growth factors in Rejuve^{MD}

- Epidermal Growth Factor (EGF)
- Fibroblast Growth Factor (FGF)
- Transforming Growth Factor-Beta (TGF-B)

11. How is Rejuve^{MD} different from retinol or antioxidants?

Rejuve^{MD} utilizes the natural power of bio-identical growth factors to signal your skin cell to produce more collagen and elastin to achieve youthful looking skin. Results are seen sooner than when using retinol or antioxidants because your skin recognizes these growth factors and can effectively produce more collagen and elastin, without causing irritation typically associated with retinol and without the waiting period that comes with using antioxidants.

12. Can I use Rejuve^{MD} after getting professional facials or treatments?

Yes, After a facial or professional exfoliation your skin's surface is more open to absorption, as Rejuve^{MD} does not cause irritation or sensitivity your skin will benefit from applying Rejuve^{MD} Face and Eye after facial treatments. However, professional chemical peels and microdermabrasion can leave the skin sensitive so ask your doctor or facialist when they would recommend you continue with your Rejuve^{MD} Anti-Aging regimen.
